SUBJECT: Letter of Recommendation, Florida Structural

The replacement of the Waterside IV common area walkway tile by Florida Structural was a major construction project completed July through November 2013. In conjunction with this work, Florida Structural painted the Waterside IV building, including owner and common area doors.

Florida Structural provided excellent on site management oversight. They took great care protecting the building from damage while construction was ongoing.

Brian Peachey, President, Florida Structural is an excellent contractor. The workmanship was superb. If the Waterside IV Board/Management expressed a concern, Brian immediately responded and corrected the problem.

The Waterside IV Board of Directors recommends Florida Structural to all associations/companies requiring similar construction or painting work. They are first rate...

Sincerely,

A handwritten signature in blue ink, appearing to read "Bud Phillimor".
