

VILLAGES AT STELLA MARIS MASTER ASSOCIATION, INC.

Dr. R. Frank Lee
President

To whom it may concern,

Our community faced the complexities of a failed construction project. The problems were serious and no viable options were at hand. After an extensive search we hired Florida Structural Group as our new contractor. They turned our construction disaster into a complete success. Brian Peachey was personally involved for the entire project. Their work was excellent, exceeding all permitting requirements and our communities very high expectations.

I must emphasize that Florida Structural inherited an over-budget, failed project with no apparent solution. Under their guidance the construction ended six weeks ahead of schedule and over one-half million dollars lower than our previous budget. All inspectors reported their solutions to be "innovative" and the quality of the work "excellent".

Without reservation we offer our highest recommendation for their excellent work. Simply stated they are the best at what they do!

If you hire them I am confident your community will share in that perspective.

Sincerely,

President
